

...innovation in brickwork...

Intelligent Brickwork® is a **revolutionary system** of **pre-assembled** feature brickwork details ideal for today's projects where speed of construction and enhanced **aesthetic appeal** are paramount to success. They combine the **best of traditional masonry build** with core Egan principles:

- Complex details are factory made to ensure **consistent quality**.
- Lightweight - they are **easy to handle** safely on site.
- Quick to install - they save time on site and **increase labour effectiveness and productivity**.

Arches

- Brick Segmental Arch
- Brick Flat Arch
- Brick Bullseyes

Available as non-loadbearing or as load-bearing designed to meet individual requirements.

Bullseye

...creativity freed...

A wide range of Intelligent Brickwork® details are available as standard, with a **virtually unlimited choice** created to meet **individual specifications**.

Quoin

Decorative Features

- Brick Quoins
- Brick Gable Feature
- Brick Stackbond Panel
- Brick Basket Weave Panel

A range of traditional details to add decoration to brickwork.

Brick Soldier Course

Bonding Courses

- Brick Soldier Course
- Brick Dentil Course
- Brick Polychromatic

Exciting string course details that add an extra dimension to masonry claddings.

Chimneys

- Brick Single Pot Chimney
- Brick Double Pot Chimney

Featuring real terracotta chimney pots, they are available as mid-ridge or gable-end options to suit most ridge pitches.

A vented version to suit Class 2 gas fires can be specified.

Prefabricated Chimney

...built in an instant...

The modules are laid to line and level, and positioned in the outer masonry leaf as appropriate for the detail to be created. They are bedded and pointed up using the same mortar as adjoining cladding to ensure a perfect match. Most modules can be cut to size on site, if required, to ensure perfect alignment and coursing.

Intelligent Brickwork® details are available in most of the Ibstock brick types. They are designed to coordinate with regular brickwork and masonry, and are ideal for use in non-loadbearing claddings in domestic and commercial construction. They have FL/F2 durability and are backed by the Ibstock Frost Resistance Warranty.
