

National Trust Headquarters, Swindon | Fireborn® Natural Blue and Staffordshire Slate Blue Smooth

Fireborn®

it's **big** and it's **beautiful**

Fireborn® is a great innovation from Ibstock. These large format clay blocks are available in various sizes, textures and colours.

All products in the Fireborn® standard and glazed ranges can be used in different combinations of size, colour and bonding patterns to create distinctive façades. Fireborn® co-ordinates with standard masonry units and can be used to complement alternative cladding solutions.

requirements

For normal elevations a designation (ii) mortar mix [1:1½:4½ cement:lime:sand] will be suitable when used at a consistency appropriate for the weight of the units. For stack bonding, stainless steel ladder type bed joint reinforcement should be used at each course.

Private House, Liverpool | Fireborn® Freedom Natural Blue

fittings available

A range of angles and returns is available in Fireborn® standard colours to assist in changes of direction:

- Corners
- Cants for window reveals and soldier courses
- Bullnose blocks for wall cappings or window sills
- Pistols to hide framing systems

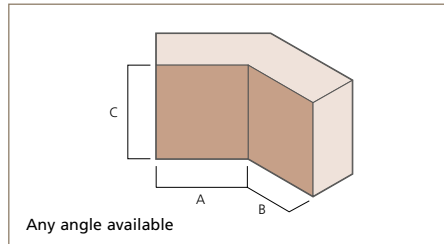

All fair faces of the fittings are shown as dark shaded areas.

Fittings are not available with Glazed Fireborn® products.

Product Quality

Fireborn® is individually gauged and batched to strict size control limits. Each product is also colour-checked to tightly defined limits to ensure consistent and repeatable colour. All this contributes to Fireborn® being a premium quality product that can be used with confidence.
